

SKYLINE SERIES ENCLOSURE

CARE & MAINTENANCE INSTRUCTIONS

To keep the stainless steel of your Skyline enclosure looking great for years to come, we recommend the following procedures:

- Wipe any water off the Skyline metal with a clean dry cloth after each shower.
- Make sure your shower is properly ventilated, especially true for steamer units to release the humidity from the enclosure.
- Keep the surface clean of any kind of material attachments or contaminants, such as dust, particles, dirty liquid, finger prints or stains.
- Use soft clean cloth, bristle brush or sponge and a neutral/mild cleaning liquid or warm soft water to clean the surface for attachments that are easy to clean.
- Clean rust spots caused by attachments on the surface using grinding detergent or detergent specially for cleaning stainless steel.
- Be careful not to scratch the surface during cleaning. Do not use cleaning mixture containing bleaching ingredients/chlorine. Do not use steel wool or an abrasive tool.
- Always rinse the surface well with soft clean warm water after cleaning using detergent and wipe dry.
